

# idrorelax vision 2.0

Climaveneta device for plant's supervision: units and hydraulic terminals connected together for an immediate touch control.

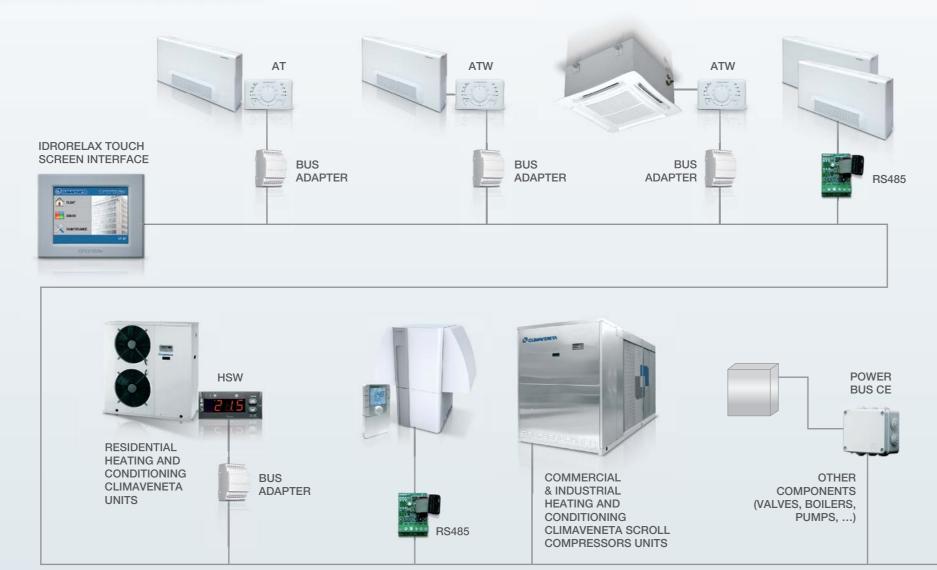

# **UNIT DESCRIPTION**

Idrorelax is the Climaveneta interface for building comfort automation. Up to 224, including air conditioning units and hydraulic terminals, can be wired together.

Idrorelax is suitable for all the Climaveneta terminals range and most of the units.

Idrorelax consists of a touch screen interface, available both for wall and panel installation, to be wired with each point (units or terminals) control through RS485 and bus adapter. All of these components are supplied by Climaveneta, customising the tool on the plant's design. The 'Vision 2.0' release is characterized by a restyling of the selection masks that are now much more user-friendly; moreover, the possible connection devices between system and single points have been optimised.

The diagram is purely representative. Refer to the available IDRORELAX technical documentation for more information about compatibility between the system and components.

#### **GENERAL FEATURES**

The touch screen interface let the user the capability to navigate intuitively and smartly through the pages controlling:

## Operating mode

on/off, plant's cooling/heating mode or automatic in case of an INTEGRA unit installed. The operating mode can be set both at global level, for the entire building, and at sub-level, for dedicated areas of the building (the creation of these areas has to be set up by competent service people during the system's commissioning)

#### Sceneries

temperature set-point, ventilation and operating mode can be specifically set per each sub-plant

#### **■ Time bands**

to regulate the on/off of each sub-plant

#### ■ Unit's set point

related to the hydraulic terminals demand

#### **■** Terminal's set point

individually or in groups

Moreover, Idrorelax gives a complete and immediate visualization of the operating mode (set point, alarms, on/off) of the entire customer's plant: chillers, heat pumps, units for 4-pipe plants, boilers, fan coils, pumps and valves are now reachable from a single point thanks to Idrorelax.
